

# YASIN SHUMAN

SOFTWARE DEVELOPER // PASSIONATE LEARNER

(415) 966 6335 – email@yasin.io – yasin.io

---

## EXPERIENCE

### **BLOCKCHAIN DEVELOPER : Pulse (San Francisco, CA), 2018**

Tachyon Cohort 2018. Pulse is an end-to-end protocol and app suite seeking to disrupt push marketing and search advertising.

### **FOUNDER : Buzzy (San Francisco, CA), 2017 – Present**

Push notifications sent to nearby phones without any apps.

- ROI for retail stores was over 80% greater than traditional campaigns.
- Wrote 100% of the frontend and backend codebase in HTML5/Node.js/MongoDB

### **FOUNDER : Loyal Loops (San Francisco, CA), 2015 – Present**

Loyalty software for tablet based Point of Sale systems.

- Created over 15 loyalty and drip marketing apps for various Point of Sale Systems.

### **CO-ORGANIZER : Oakland Blockchain Developers (Oakland, CA), 2018 – Present**

An 1100 member meetup group focused on hands on training and education of decentralized technologies.

### **FREELANCE WRITER : MadHive (New York, NY), 2018**

Created content that helped illuminate the grievous breaches of user privacy and the need of a paradigm shift to give agency back to the end user.

### **FREELANCE WRITER : Fr8 Network (New York, NY), 2018**

Created content about the key challenges facing the logistics industry and how decentralized technology can be utilized to help the various players in the ecosystem.

---

## PROJECTS

### **Cashey : 2018 - Present**

A self service point of sale kiosk for quick service restaurants and cafes. The backend is written in GO with a PostgreSQL database. The kiosk client application is written in React Native.

### **NoFilter : 2018**

A censorship resistant OSS tool utilizing IPFS and the Ethereum EVM to allow information to be freely shared. The UI is in React, directly interfacing with the IPFS & EVM nodes. The smart contracts are written in Solidity and the entire project is hosted on IPFS.

---

## SKILLS

Golang, Javascript, Java, Solidity, React, React Native, MongoDB, MySQL, PostgreSQL, FireBase

---

## AWARDS

### **World Crypto Economic Forum Hackathon - Crypto Transfer App - 3rd Place - 2018**

Our team created an app which allows the transmission of crypto payments via slack commands with atomic swaps to the receivers currency of choice.

### **Lambda School Hackathon - Wallet Watcher - 3rd Place - 2018**

A monitoring tool which, when given an wallet or DApp address provided SMS alerts based on user settings.

---

## EDUCATION

### **BACHELOR OF ARTS : Cleveland State University**

International Relations with an Economics minor.

### **COMPUTER SCIENCE CERTIFICATE : Lambda School**

Emphasis on full stack web development.

### **ETHEREUM DEVELOPER CERTIFICATE : ConsenSys Academy**

Core Technologies Covered: Solidity, Web3.js, Truffle Suite, IPFS
