Current Projects

NoFilter

A censorship resistant OSS tool utilizing IPFS and the Ethereum EVM to allow information to be freely shared. The UI is in React, directly interfacing with the IPFS & EVM nodes. The smart contracts are written in Solidity and the entire project is hosted on IPFS.

EXPERIENCE

Buzzy, San Francisco — Founder

September 2017 - Ongoing

Push notifications sent to nearby phones without any apps.

- ROI for retail stores was over 80% greater than traditional campaigns.
- Wrote 100% of the frontend and backend codebase in HTML5/Node.js/MongoDB

Loyal Loops, San Francisco — Founder

January 2015 - Ongoing

Loyalty software for tablet based Point of Sale systems.

- #1 loyalty pp in the Clover app store 2 years in a row with over 4,000 installs in North America and Europe.
- Established vendor relationships with Clover, Verifone, Gilbarco, Poynt and Revel Systems.

MadHive, New York — Freelance Writer

February 2018 - April 2018

Created content that helped illuminate the grievous breaches of user privacy and the need of a paradigm shift to give agency back to the end user.

Fr8 Network, New York — Freelance Writer

February 2018 - March 2018

Created content about the key challenges facing the logistics industry and how decentralized technology can be utilized to help the various players in the ecosystem.
